I hereby request, authorize and empower the Annapolis Valley Regional Centre for Education to administer medication as described herein to the student named above. I release any staff member and the Annapolis Valley Regional Centre for Education from any legal liability that may result from the administration of such medication. I also agree to indemnify the Annapolis Valley Regional Centre for Education against claims at any time made by the student named or by MSI arising out of the administration of medication described herein. I understand that the dosage of medication typically be limited to a one month supply and that I am responsible for completing this form in the event that the prescribed medication, amount or frequency of dosage, handling or storage requirements change.

I acknowledge and understand that as a parent/legal guardian I am responsible to ensure there is medication in sufficient amount and dosage to meet the needs of the student every day the student is in school and requires the medication to be administered. I also understand and agree that if there is insufficient medication at the school I will be contacted to make arrangements to transport new medication to the school, or to make alternate arrangements for the care of the student for the remainder of the school day. I hereby release any staff member in the Annapolis Valley Regional Centre for Education from any legal liability that may result from insufficient amounts of medication being available at the school for administration to the student.

Administration of Prescription Medication to Students

Definitions:

High Alert Medication:	Medication that when used in error, has an increased risk for causing significant harm to one's body; serious medical consequences could result from failure to administer the medication(s) according to an exact schedule or specific manner prescribed.
Route:	The path by which the medication enters the body.
Non-Prescription Medication:	Medication that does not require a physician's authorization.
Correction Bolus:	A spurt of insulin delivered quickly to bring a high blood sugar back within a person's target range for before a meal, after a meal, or a bedtime.

Near Miss:	An event or circumstance with the capacity to cause harm which has been detected and corrected before reaching the student. This "good catch" or "near miss" may not have reached the student due to chance, corrective action and/or timely intervention.
Prescription (RX):	Medication that can be purchased or given out only with written instructions from a licensed health care provider.
Carb Bolus:	A spurt of insulin delivered quickly to match carbohydrates in an upcoming meal or snack
